

Arcana Arena

Story

The setting is a fantasy world with magic and this game is also a game that exists within the world and is typically conducted by magic education institutions for testing the aptitude of the students and their abilities.

Gameplay Loop

Gameplay Stats:

Player HP = 30

Mana Bank Capacity = 50

Pre-Game Phase:

Players choose which **Tablet** that they want to play with and decide who draws the cards from the deck. Drawing cards does not give any advantage or disadvantage.

1. Card Draw Phase:

The player who is drawing cards, will draw 10 cards one at a time and place the cards in the center of the table for all players to see. For every card that is drawn if any player has that card on their **Tablet** they can place a marker on that matching card.

Players during the **Card Draw Phase** can declare that they cast a spell when they have enough mana points on their tablet to cast a spell. The order that spells are cast in during the **Spell Cast Phase** are determined by the order in

which players declare their spell during this phase. If players declare a spell cast they cannot declare a Mana Surge(Bingo) later in the same **Card Draw Phase**, so it is a decision on whether you want to cast your spell sooner or hold for the potential of getting a Mana Surge(Bingo).

Mana Surge can only be called if a player gets a valid pattern match with the currently drawn cards.

2. Spell Cast Phase:

Players now, in the order that they declare their spells, craft and then cast spells with the cards that have mana points over them on their Tablets. ***See Spell Crafting section for details***

3. Bank Deposit Phase:

Any leftover marks on a players' Tablet is deposited as 1 point per marker in their bank.

4. Effects Update Phase

Players update any effects that are currently active, counting down their durations.

5. End of Round:

If there are still more than one player standing or no player has reached the **Mana Bank** goal then go back to the **Card Draw Phase** and start a new round.

Spell Crafting:

Card Attributes:

Elements:

Alignments:

Type:

Extracting Attributes:

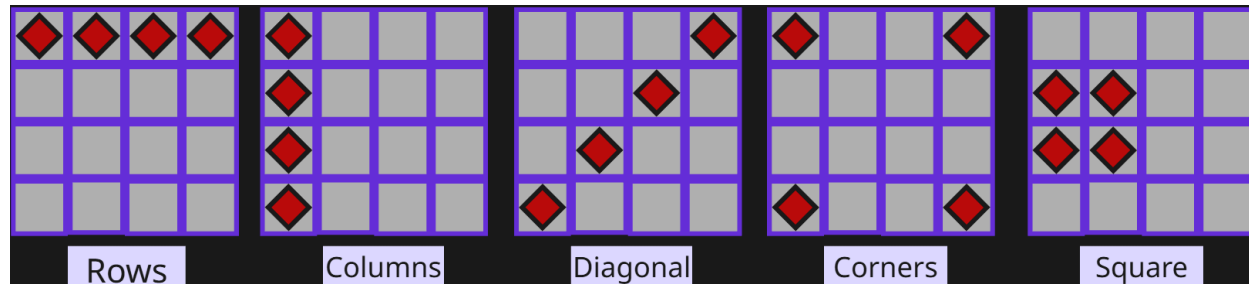

Spells are crafted by extracting attributes from cards that are present in your bingo match.

A Card consists of 3 attributes from top to bottom: Element, Alignment and Type. Each card can only have 1 attribute extracted from it.

When Crafting your spell you extract 1 of each attribute type from your bingo matched cards and then cast your spell.

In this example there's a square bingo match and from that an aqua, void and word attribute is extracted from the cards to create a **Cleansing Splash** spell.

Patterns To Match:

Mana Surge Bonuses

If a player gets a pattern match and then declares a Mana Surge rather than simply declaring a normal spell then they can choose between the following Mana Surge Bonuses during their spell cast phase.

- Free Cast - The spell within the Mana Surge pattern can be cast without consuming mana
- Bonus Cast - The spell within the Mana Surge pattern can be cast without taking the players cast turn
- ~~- Empowered Cast - The spell within the bingo can be enhanced for more potent effects~~
- Swift Cast - The player can cast the spell faster which pushes them up 2 in the cast queue.

Spell List

General Notes For Spells:

- All Status Effects(Buffs/Debuffs/Runes) last 3 rounds unless consumed
- Neutral Attacks of both rune and word type spells do 4 DMG
- Dark Spells do 2 DMG on top of their status effect.
- Word type Spell Effects are applied after they are casted during the Spell Casting phase.
- Rune type Spell Effects are reactionary and are typically applied when the caster is attacked

		Radiant	Neutral	Void
Terra	Word	Rock Ward: Blocks 1 counter attack per round: Does not block status effects	Terra Blast: Does 4 DMG to target.	Stone Cage: Blocks targets next outgoing attack. Does not stop counter attacks or

				status effects
	Rune	Stone Flesh: Blocks 1 instance of DMG per round. Does not work on dmg from status effects.	Terra Counter: Does 4 DMG to attacker. <u>Consumed</u>	Earthen Shackle: When attacked, the attacker is shackled and is dropped down 1 place in the spell cast queue.
Sol	Word	Stoked Flames: Increases outgoing DMG by 1	Sol Blast: Does 4 DMG to target.	Lingering Heat: Ignites target and does 2 DMG at the beginning of every round
	Rune	Cleansing Flame: Blocks 1 instance of a debuff per round works on currently applied debuffs. <u>Consumed</u>	Sol Counter: Does 4 DMG to attacker. <u>Consumed</u>	Raging Inferno: Deals equal DMG received to attacker. <u>Consumed</u>
Aqua	Word	Soothing River: Heals the target for 3 HP. <u>Consumed</u>	Aqua Blast: Does 4 DMG to target.	Cleansing Splash: Dispels target's applied buff. <u>Consumed</u>
	Rune	Life Geyser: Heals player for 6 HP if HP reaches zero while buff is active. Player must have 4 additional mana marks on their tablet to cast this spell. <u>Consumed</u>	Aqua Counter: Does 4 DMG to attacker. <u>Consumed</u>	Sapping Ocean: Apply to a target and any healing they receive is also given to you for debuff duration.
Aero	Word	Swift Current: Next turn you go up in the Spell Cast Queue by 1	Aero Blast: Does 4 DMG to target.	Sweeping Breeze: Steals 2 mana marks from targets Tablet after spell cast phase before mana is deposited. <u>Consumed</u>
	Rune	Deflecting Wind: Redirects status attack entirely to another player. The new target is	Aero Counter: Does 4 DMG to attacker. <u>Consumed</u>	Disruptive Draft: Attackers' spell is dropped down by 1 in the spell queue.

		the next player in the spell queue or wrap to beginning if last.
